## PROJECTS:

| | |
|---|---|
| March 2023: | **Web Scraping for Career Page**<br>A Python web scraping tool is under development to collect job listings from company career page. It will extract essential information such as job roles, required skills, and comprehensive job descriptions. |
| June 2023: | **Weather Report**<br>Using Python weather report project gives instant forecasts. Users input their location for quick updates on temperature and wind speed, simplifying daily planning. |
| October 2023: | **System Usage Alerts**<br>It is a Python project that tracks laptop usage and sends alerts when predefined time limits are exceeded. Using libraries like psutil and tkinter, it helps users manage screen time effectively. |

| January 2024: | **Patient Medical Records (PMR)** |
|---|---|

**Patient Medical Records (PMR)**

January 2024:

Using HTML, CSS, and Bootstrap, PMRs serve as repositories for patient data, including personal details, medical history, prescribed medications, and insurance information. They play a critical role in maintaining care continuity, facilitating provider communication, and ensuring compliance with legal regulations.

April 2024: **Personal Portfolio**

It's a showcase of my skills in HTML, CSS, and JavaScript. With sleek design and smooth interactivity, I've crafted a user-friendly space to display my work, skills, and experiences. Excited to share this reflection of my journey in web development!
